## Key Objectives

The HCS Annual Plan 2024 provides a strategic overview of the key areas of improvement and strategic quality and performance reports for Health and Community Services (HCS) across the breadth of the department. It has been agreed at the Health and Community Services Advisory Board ("The Board") and can be accessed on the Board's <u>webpage</u>.

The Board has agreed five objectives which set out what we aim to achieve. The Board Assurance Framework (BAF) provides a mechanism for the Board to monitor the effect of uncertainty on the delivery of these agreed objectives. The BAF contains risks that are most likely to materialise and those that are likely to have the greatest adverse impact on delivering the strategy.

HCS has developed five key objectives for 2024.

#### **Quality and Safety**

We will constantly review and compare our services to the best. We will learn and develop when we see good practice and when there are lessons to be learnt.

#### Experience

We will drive a culture that places the patient at the heart of everything we do and champions the use of continuous improvement that is rooted in patient feedback.

#### **Operational Performance**

We will drive improvements in access to high quality, sustainable and safe services.

#### Workforce and Culture

We will lead and support a high performing workforce.

#### Finance

We will ensure effective financial management through budget planning, monitoring/reporting, and delivery of HCS services within agreed financial limits.

### **Service Performance Measures**

Service Performance Measures (SPMs) are a sub-set of the Quality and Performance Report indicators and are published alongside other government departments' SPMs. They aim to provide a broad overview of the delivery of key services by all government departments. Our Service Performance Measures for 2024 are:
