

Number of individuals with HIV known to Health and Community Services in each year, from 2018 to 2023

| Year | Number |
|-------------|---------------|
| 2018 | 86 |
| 2019 | 90 |
| 2020 | 98 |
| 2021 | 110 |
| 2022 | 116 |
| 2023* | 145 |

* Figures for 2023 have been derived through new reporting methodology. For comparison and assurance, analysis of 2023 data was also completed using the historic reporting and numbers saw a proportionate increase. It is considered that data for previous years did not capture all individuals, and that numbers for these years are undercounted.
