Department's notes

No breakdown is available for Consultancy Costs for the period 1999-2003.

The above list was reviewed by the Senior Management Team for completeness on 31 May 2013.

Caveats

Total costs for some reports may not be shown in the years the costs were actually incurred.

i.e. costs may have been incurred in more than one year but have been shown in the year the report was published.

This report has been prepared from information available.

States policy on retention of records is 6 years and therefore there is no guarantee that complete records are available from 1999 and this would impact on accuracy of this information.

A Return initially compiled from list of Consultants Reports with Costs filed on gov.je (all items with a YES in column E above)

B Items not on gov.je added from following sources:

Period: 2004-2013

Period: 2008-2010

Period: 2002-2013

C The above list was reviewed by the Senior Management Team for completeness on 23 May 2013.

Caveats

Total costs for some reports may not be shown in the years the costs were actually incurred.

i.e. costs may have been incurred in more than one year but have been shown in the year the report was published.

This report has been prepared from information available.

States policy on retention of records is 6 years and therefore there is no guarantee that complete records are available from 1999 and this would impact on accuracy of this information.

Department's notes

A range of work will be reflected in these costs, not simply the cost of producing the report. Work will include research, modelling, investigations, benchmarking, interviewing, provision of advice, presentations etc.

The submission represents the Department's best endeavours in the time constraint

Financial analysis / cost pre 2003 cannot be provided as this represents a period pre JDE

The information has been compiled with input from key representatives within the Department, review of costs (coded to consultancy and elsewhere), and previous information provided within the Department.

A number of the reports contain staff / patient confidential information and are exempt from publication.

Department's notes

Reports from 2001 pre-date the Navision accounting system, therefore would be very time consuming and costly to retrieve Health & Safety Reports have been excluded as a result of sensitivity and restrictions over H&S Legislation

This response includes tax-funded consultancy reports only and does not include those funded by the Health Insurance or Social Security Funds.

Actuarial and Audit reports have been excluded as these are considered professional fees not consultancy.

24	2006 Technical / Capital Reports x 8									35,151 *							

Department's notes

* Costs of some technical / capital reports are included within the overall costs of the Solid and Liquid Waste Strategies - these are still being investigated as the overall spend on consultancy did not always result in a specific report being produced. Totals currently exclude these costs, but include the number of reports.

Costs and details of reports prior to 2006 are not available, due to time and record keeping constraints. Invoices prior to 2006 have been destroyed in accordance with the department's records management policy. Due to a change in financial systems in 2003 any financial data prior to that date is not easily available. Supplier payment details do not include reference to a report and therefore isolating such spend is often not possible without reference back to original invoices.

The majority of reports produced for the department by external parties are technical or factual reports (such as condition surveys, ground investigations, usage surveys etc) and have been defined as outside the scope of this question - details are included in the aggregate totals by years.

Only major technical reports are included above, some more minor reports and those costing less than £2,000 may be excluded from the figures above.

Only consultants' costs resulting in a report are included above. Design and management of contracts, for example, will be excluded.

Department's notes:

Cost of Reports are shown in the year costs were actually incurred which may not be the year in which the report was published

Return initially compiled from list of Consultants Reports with costs filed on gov.je (all items with "yes" in column E above)

Items not on gov.je added from the following sources:

Prior to 2002 detailed information was recorded on the Millennium financial system. A summary report has been produced (heavily caveated)

It has been requested that Departments submit these years (199 - 2002) as a total spend figure as it is not possible to attribute to individual reports

Previous question answered in 2001 (for the period 2006 - 2008) requested all consultancy costs, whereas this question is only for information on costs of "consultancy reports"

States Policy on retention of records is 6 years, therefore there is no guarantee that complete records are available from 1999 and would therefore impact on the accuracy of this information
