

File note of meeting between [REDACTED] and Tim Daniels at JBL 23/03/2023

Key points raised by [REDACTED]

- This Lido is an iconic location and one that promotes the area and island well, but needs a proper maintenance programme given the demand for year round access to both the venue and the pool
- Has been impressed with how [REDACTED] has operated the Lido in putting on events and also supporting the local community through such things as hosting the regular Havre de Pas meetings and providing refreshments.
- When asked by [REDACTED] if the exclusion of the wider public when private events were being held was a material issue, [REDACTED] did not believe that was the case and in fact quite the contrary believes [REDACTED] strikes the right balance.
- Commented that the quality of events and service provided by [REDACTED] was of high quality and a significant improvement on the previous café.
- Believes [REDACTED] brings real enthusiasm and innovation to the Lido and the Havre De Pas area andn that it would be very difficult to find a similar business/ entrepreneur to take this project on.
- Believes that the proposal P61 that was approved by the States last year provides the right way forward to bring the two parties back together and agree a sensible way forward in terms of maintenance programme supporting a new lease. The working group would help give clarity to the longer term strategy of the Lido taking account of the wider Havre de Pas plans as they evolve.
