The process to register and licence the business in Jersey was very straightforward and Locate Jersey provided excellent support during this process. The key reasons for choosing Jersey included the level of professional (legal and accounting) support on the Island, access to local, qualified staff and the closeness to international markets. In addition the quality of the living conditions and beautiful environment made Jersey a welcome location for those employees who have relocated."

"Randgold Resources Limited is an African focused gold mining and exploration company with listings on the London Stock Exchange and New York's NASDAQ. Randgold Resources has operated very successfully from the island since its incorporation in Jersey in 1995. During that time, the company has grown to be one of the 100 largest companies listed on the London Stock Exchange. Jersey's established financial industry with direct access to international banking and capital markets, together with advanced communications, highly regarded judicial system, and an open and progressive attitude towards business development, make Jersey an excellent location for Randgold Resources' corporate office. Jersey's close proximity to European cities, offering good connections to our sites in Africa, is also proving to be invaluable."

ROYAL ROAD MINERALS LIMITED
royalroadminerals.com

"Royal Road Minerals chose Jersey as a base due to its straight forward regulatory regime and no-nonsense approach to business support. Since settling on the island we have become familiar with the many other business-friendly benefits that Jersey offers – regular direct flight connections into London (arriving in the city faster than many mainland commuters) and can readily access our European-based investors. Jersey's diverse population and status as a well-regarded international financial centre means experienced and often multilingual support staff and financial professionals are readily available. Jersey is a safe and healthy environment for head office staff and their families and there are few of the stressful side-effects to head office work in large cities which aids morale and increases productivity."
