APPENDIX A

The role of the Commission

The Commission is a body established by the States of Jersey. Although the Commission works in close consultation with the Legislation Committee, which also organised its funding and acts as its channel of communication with the States, it is an independent body which reports will be made available, unaltered, to the public.

The role of the Commission is defined in its terms of reference, which are set out as follows in the proposition establishing it:

It shall be the duty of the Commission to identify aspects of Jersey law which it considers should be examined with a view to their development and reform, including in particular the elimination of anomalies, the repeal of obsolete and unnecessary enactments, the reduction of the number of separate enactments and generally the simplification and modernisation of the law, and to those ends:

- (a) to receive and consider any proposals for the reform of the law which may be made or referred to them;*
- (b) to prepare and submit to the Legislation Committee from time to time programmes for the examination of different branches of the law with a view to reform; and*
- (c) to undertake, pursuant to any such recommendations approved by the Legislation Committee, the examination of particular branches of the law, such consultation thereon as the Commission shall think fit, and the formulation by means of draft bills or otherwise of proposals for such reform.*

APPENDIX B

Upon accepting a topic for review the Commission appoints one of its members to act as the Topic Commissioner to conduct and co-ordinate all of the Commission's work on that topic. On his recommendation the Commission seeks to appoint a Jersey lawyer currently practising in that field as Topic Practitioner to assist him generally and to ensure that the Commission's work remains relevant to the issues actually arising in day-to-day practice. The Topic Commissioner is not paid by the Commission and in practice the Topic Practitioner has not asked for payment, although payment has been made in some cases where necessary. Any necessary legal research will usually be carried out by others: either by professional researchers under contract or by experts willing to give their time as a public service.

The procedure for the review of each topic will commonly fall into the following steps:

- 1 finding out whether there is a problem, and if there is, defining exactly what it is;
- 2 researching and summarising the existing law relevant to the topic;
- 3 suggesting how the relevant law might be changed to solve the problem;
- 4 preparing and publishing a consultative document based on items 1, 2 and 3;
- 5 receiving and discussing representations made in response to the consultative document;
- 6 preparing and publishing a final report culminating in either a detailed brief for the Law Draftsman or in a draft law prepared in consultation with the Law Draftsman.
